

## POSiSales Update

New POSiSales features bring more power to your business.

Dear POSiSales user,

We're very excited to announce some great new features to POSiSales, to enable you to deliver even greater convenience to your customers and your staff.

- Discounting invoices is now possible by entering either a dollar value (eg. \$10) or a percentage amount (eg. 10%) before printing the receipt.

GST Total \$ 2.67  
**\$ 26.46**  
Discount  
10 Value % Calculate

- Split billing can now be enabled via the Settings page. A bill can be split evenly by however many splits you input, or you can nominate specific amounts for each split and view the balance remaining. Different payment methods can be used for each payment. Eg. a \$150 bill could be split four ways - \$37.50 each, or three people could pay \$40 and one could pay \$30.

Number of Payments   2 Payment 1  
Amount 10 ✓  
Payment1 Cash 10  
Payment2 Cash 14.70  
Cash Visa  
MasterCard Amex  
Debit Card  
Bal 4.70  
Cancel Done

- Multiple copies of orders and receipts can be printed.

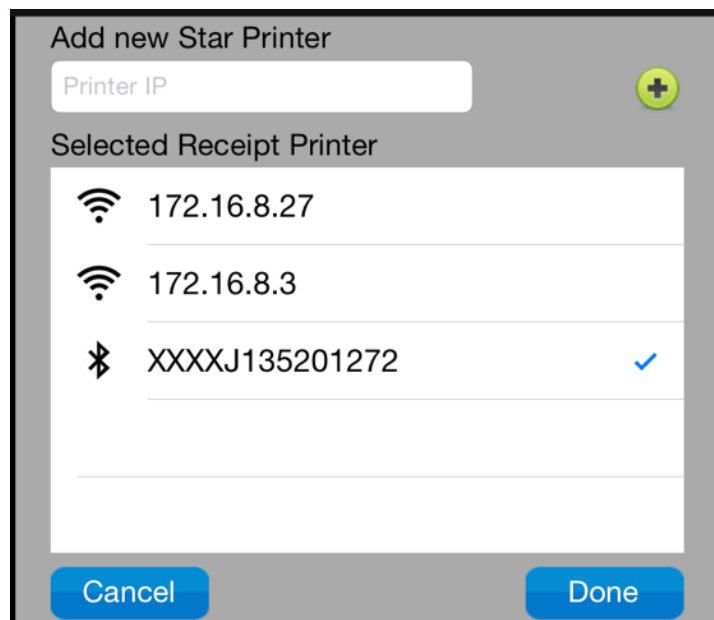

Interim invoice (1) Print final (3)

- Multiple printers can be designated based on the destination per item category. Invoices with products across multiple categories will print to each category's printer. Eg. "Food" prints to the kitchen, "Drinks" prints to the bar.

A screenshot of a settings dialog box. It has a dark grey background with rounded corners. At the top, there is a label "Category Name" followed by a white text input field containing the word "Drinks". Below that is a label "Printer IP" followed by a white text input field containing the IP address "172.16.8.27". At the bottom, there are two buttons: a yellow "Update" button and a grey "Cancel" button.

- POSiSales is now compatible with the Zebra iMZ bluetooth printer, which works independently of a wireless network. This is a great solution for a contractor or businesses working onsite or a location without access to power (e.g. a market situation).

A screenshot of a dialog box titled "Add new Star Printer". At the top, there is a label "Printer IP" followed by a white text input field and a green plus icon. Below this is a section titled "Selected Receipt Printer" containing a list of printer options. Each option has a wireless icon and an IP address. The first option is "172.16.8.27", the second is "172.16.8.3", and the third is "XXXXJ135201272" with a blue checkmark to its right. At the bottom of the dialog, there are two blue buttons: "Cancel" and "Done".

These new features are now available as an update via the App Store. We hope you'll find them useful and we look forward to bringing you more great updates in the future.

Thanks for using POSiSales.
